

# Ratchet Tie Down

*Cargo Restraint Systems*

**YOYEE**  
[www.yoyee.com.tw](http://www.yoyee.com.tw)

# Introduction

- The main purpose of the Ratchet Tie Down is to safely secure equipment, cargos and products, wether they are being transported on Trucks, sailing in the open sea on Cargo Ships or via Air Freight. This item can also be used in warehouses to secure products on pallets ready to be sent out.
- This is a very common product nowadays that replaces the Old-fashion rope knot we all grew up with.

# A few examples below:

Motorbikes

Boats

## Camping

## Products on Pallets

# Overcenter buckles

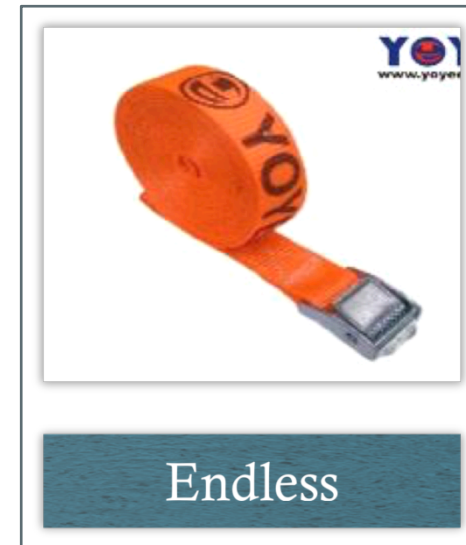

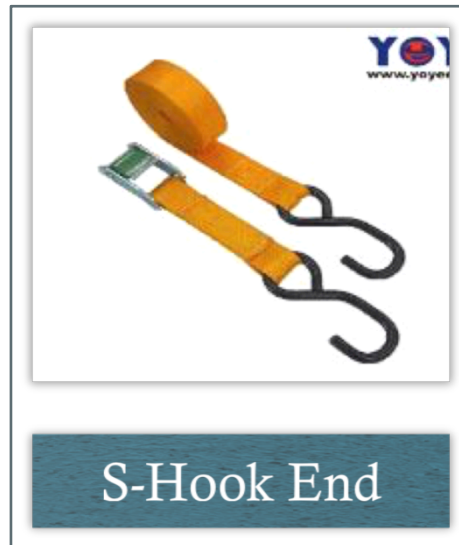

This product, although not entirely in the same category, is used for securing the side curtains of Trucks.

Width: 75mm  
MBS: 7500Kgs  
Length as inquiry

Width: 100mm  
MBS: 90000kgs  
Length as inquiry

# Inspection

## Key Points:

- Inspect regularly to avoid damages to goods or injury to oneself
- Check straps for cuts, abrasions and color fading signs
- Check components for cracks, warped or distorted shapes and rust
- Work with the ratchet by opening/closing it to see if any parts are not working right before use
- Should any of the above occur, please discard the product

# The End

Please contact me, should you have any queries regarding this product.
